

March 20, 2019

Dr. Larry Rudolf,

I was raised in the 50's, we did not visit the dentist unless there was a problem. We didn't have the fluoride, only drank milk, water and occasionally juice. My first visit to the dentist was a tooth removal with nothing to deaden the pain, thus a traumatic affair for a 5 year old, and nearly a lifetime.

As a military wife in the late 60's, we were not provided with dental care, our budget unfortunately did not either. When our children came along we did what we could to ensure they had good dental care. Today they have beautiful teeth.

Although I did what I could to care for my teeth being intimidated by my fears and not having enough money, complicated by medication for osteoporosis, I had to lose my upper teeth.

Fam, and I will forever be grateful to Dr. Fammartino for the compassionate understanding care I have been given. He showed he genuinely cares about me. I feel very blessed to have found him, Yvonne, Maryland, and the others at 3 Rivers Dental. The practice is appropriately named, as it

does send our years far away down the
River!

I no longer have that overwhelming
Anxiety. And no one will ever know how
truly blessed I feel, to for the first time
in my life I have "pretty teeth".

Thank you, your staff and especially
Dr. Fammartino for helping me climb one of
the largest mountains of my life.

Its very meaningful to come to a
practice where the people there Care.

God Bless,

Love Always,

Susan K. [REDACTED]
